

Hydrofluoroether HFE-6512 (Replacement of FC-3283)

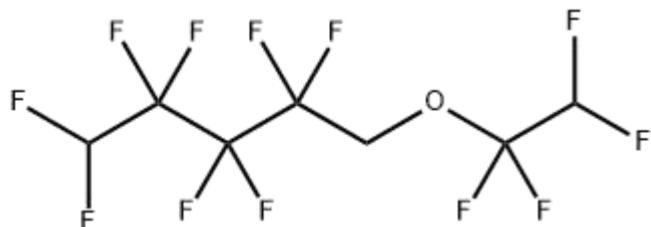

Synonyms:

1H,1H,5H-Perfluoropentyl-1,1,2,2-tetrafluoroether;
1,1,2,2,3,3,4,4-Octafluoro-5-(1,1,2,2-tetrafluoroethoxy)pentane

CAS No.: 16627-71-7

Supplier: FandaChem

Chemical structure:

Features:

Fluorinert Electronic Liquid.
Heat transfer agent.
Replacement of 3M Fluorinert Electronic Liquid FC-3283.

Boiling Point: 133°C

Density (g/ml): 1.626

Package: 25kg/Drum;250kg/drum

Transportation & Storage

1. Transported as non-dangerous goods.
2. It should be stored in a clean, dry and ventilated warehouse.
3. Keep the container closed to prevent high temperature and sunlight, away from heat source, fire source and strong alkali.
