With up to 30 days of antimicrobial protection, it's just what the doctor ordered.

- ✦ Protective barrier reduces risk of bacterial cross contamination on high touch, high risk surfaces
- ✦ Environmentally friendly, non-toxic/non leaching, hypoallergenic antimicrobial technology
- ✦ Promotes lower ATP (Adenosine Triphosphate) scores
- ✦ Cured treatments remain effective in the presence of bleach between disinfectant applications
- ✦ Supports accreditation mandates for patient protection
- ✦ Available in various bottle and bucket sizes for convenient spray-and-wipe applications, and totes for electrostatic spray applications

Active antimicrobial molecule "spike" impales single-cell bacteria, destroying it on contact. Up to 30 days of durable efficacy.

Active Ingredient:

3-(Trimethoxysilyl)propyl dimethyl octadecyl ammonium chloride 1.0%

CAS No.: 27668-52-6
