

Omicure BC-120 Equivalent Alternative from China

(Boron Trichloride Amine Complex)

Cas#: 34762-90-8

Supplier in China: FandaChem

Synonyms:

Latent Curing Agent, Accelerator,
Boron Trichloride Amine complex,
Boron trichloride diMethyl octylaMine coMplex,
Octyldimethylamine trichloroborane complex,
Borontrichloride-octyldimethylamine complex (1:1)
BCL3 Amine Complex,cas 34762-90-8,
BCL3:DMOA

Description and Introduction

1. Omicure BC-120 cas 34762-90-8 by Huntsman is boron trichloride amine complex designed for adhesive applications.
2. Omicure BC-120 is used as a latent curing agent and accelerator in the aromatic amine, acid anhydride or dicyandiamide cure of epoxy resins.
3. Omicure BC-120 is used in potting adhesives.

Applications

Potting
Adhesives
Castings
Electric enamels Filament winding Pultrusion

Packing: 25kg/Drum

Transportation & Storage

1. Transported as non dangerous goods.
2. It should be stored in a clean, dry and ventilated warehouse.

OMICURE® BC-120

Latent Curing Agent, Accelerator
